

## Alta Eco Max Inks

Our Inks are mild solvent based inks for use in Roland Soljet and Versacamm series printers. If you are currently using Roland's Eco Sol Max inks then this is the product for you.

- ✓ 100% plug and play cartridges, no color shift
- ✓ Mix with current inks, no line flushing required
- ✓ No profiling needed, use your existing ICC profiles
- ✓ Don't need a full set? Cartridges are interchangeable with OEM Supplies

## FAQs

Q I've tried other inks and the profiles were completely different, am I going to have the same problem?

A No, these inks have the same CMYK color values as your OEM inks, that's what makes them different from other aftermarket inks. Years of testing and using have proven that Alta Inks are 100% compatible.

Q Do you supply profiles for these inks?

A No need to, just keep using your current profiles they use the same.

Q Will these inks void my warranty or service agreement?

A No, Using Alta Inks does not void any warranties or service agreements with Roland. Roland's warranty states: "Roland inks, ribbons, media and print head technology have all been engineered to work in unison and have been tested to ensure consistent quality output. If ink, ribbons, or media supplied by a manufacturer other than Roland causes damage to the print heads used on Roland printers. That damage will not be covered by Roland's warranty." If we can track any problem to our inks, Alta Inks will pay for it.

Q During the change over, can I mix Roland and your cartridges in the same printer?

A Yes, they are fully interchangeable.

Q What's your guarantee?

A If these inks don't perform as claimed, return the remaining inks for a refund your full purchase price.
